BELLEVUE AND ALLIED HOSPITALS

ANNUAL REPORT FOR 1919

Hon. JOHN F. HYLAN,
Mayor, City of New York.

SIR—On behalf of the Trustees of Bellevue and Allied Hospitals I present herewith the annual report of the Department for the year 1919.

THE DEPARTMENT AS A WHOLE

On January 3 the Mayor appointed Mr. Morris Weinberg as Trustee to succeed Mr. Samuel Sachs, resigned, term expiring January 31, 1921.

The annual election of officers of the Board was held February 4. Dr. John W. Brannan was re-elected President and Mr. John G. O'Keeffe re-elected Secretary.

At the request of the Board of Estimate and Apportionment the Department furnished a report showing which improvements requiring an issue of corporate stock were of the greatest urgency, together with a statement showing the increased annual expense which would be placed upon the City for compensation of additional employees and the cost of supplies for operation of new buildings to be constructed.

It has been necessary to ask for a re-transfer of corporate stock to the extent of \$10,000 for construction and installation of additional laundry machinery at Bellevue Hospital.

Several times during the early part of the year the hospitals were greatly handicapped by the shortage of milk; small quantities were received from time to time and distributed among the children and those most acutely ill in the hospital, and for the remaining patients and employees it was necessary to use condensed milk.

Upon the return of Mr. James K. Paulding from war service Mr. O'Keeffe resigned as Secretary, whereupon Mr. Paulding was elected Secretary, effective June 17.

The death on July 10 of Dr. Abraham Jacobi, Consulting Physician and Founder of the Children's Service at Bellevue, was reported, whereupon the following resolutions were unanimously adopted:

Resolved, That the Board of Trustees of Bellevue and Allied Hospitals has heard with profound regret of the death of Dr. Abraham Jacobi, Consulting Physician to Bellevue Hospital and founder of the first continuous children's service in a general hospital in this city; who, by common accord of his fellow practitioners, based no less upon their respect for his character than upon their admiration for his professional attainments, occupied the position of dean of the medical profession in the City of New York.

And Resolved Further, That this expression of regret be spread upon the minutes of the Board to serve as a memorial to us of his unforgettable services, and that a copy of these resolutions be forwarded his bereaved family.

On July 18 the Board of Estimate and Apportionment authorized appropriations for the preparation of plans and specifications for additional construction at Bellevue and Fordham Hospitals as follows:

	Estimated Cost of Approved Project	Appropriation made at present.
Bellevue Hospital—		
Construction of pavilions F and G.....	\$1,500,000 00	\$30,000 00
Interior and Equipment Pavilions F and G.....	750,000 00	15,000 00
Additional boilers to boiler plant.....	40,000 00	40,000 00
Additional wings to Bellevue Training School for Nurses—Construction	350,000 00	7,000 00
Building for Out Patient Department and Women's Dormitory	1,055,000 00	21,000 00
Fordham Hospital —		
Additional boilers	45,000 00	45,000 00

To meet anticipated deficits it has been necessary to request the Board of Aldermen for revenue bonds in the sum of \$8,040. Because of the difficulty in obtaining supplies under contract at satisfactory prices, the Trustees obtained permission from the Board of Aldermen to purchase them in open market, also an ambulance, for which funds were provided in the budget for 1919.

After careful consideration and approval by the Trustees the departmental estimate for 1920 was transmitted to the Board of Estimate and Apportionment and provided for salaries and wages to the extent of \$1,178,735.69 and for supplies, repairs and equipment in the sum of \$1,580,776, a total of \$2,759,521.69.

In accordance with a communication received from the Mayor the General Medical Superintendent was instructed to take the necessary steps to insure an adequate supply of coal during the winter season for the hospitals of the Department.

On September 3, Dr. John W. Perilli was appointed by the Mayor as Trustee to succeed Mr. Leopold Stern, whose term expired January 31, 1919. Upon retirement of Mr. Stern from the Board of Trustees the following resolutions were adopted:

Resolved, That the Board of Trustees of Bellevue and Allied Hospitals has learned with deep regret of the retirement of Mr. Leopold Stern as a member of this Board after nearly fifteen years of faithful and conscientious service in the cause of the city's sick poor. And, to the end that these services shall be gratefully remembered, be it further

Resolved, That his record be inserted in the permanent minutes of the Board, and that a copy thereof be forwarded to Mr. Stern,

together with an expression of the respect and esteem of his fellow Trustees.

At request of the United States Public Health Service a class in syphilis has been established in the out-patient department at each of the hospitals. Approximately thirty nurses were trained at Bellevue in the conduct of such clinics. Upon completion of their course they were to act as supervisors for the public health service in various states throughout the Union.

Under a law enacted by the legislature we are now receiving mentally defective children sent to us by the courts for observation by our alienists. After their condition has been determined they are sent to the New York State Institutions at Letchworth Village, Rome and Newark. We have already received a considerable number of these children and it is estimated that we shall have a constant census of about 200. In order to care properly for these patients the admission of drug addicts was restricted to absolute emergent cases.

Dr. Mark L. Fleming, Assistant Medical Superintendent, having received his discharge from the army, returned to duty on May 15.

In considering the proper course to be followed in the hospitals for treatment of patients who come under the Workmen's Compensation Law, the General Medical Superintendent was requested to make a comprehensive inquiry and present a report on the subject in order that action may be taken by the Board.

The employees of the Department responded generously in their subscriptions for Victory Bonds as follows:

Bellevue	\$32,200 00
Gouverneur	14,150 00
Harlem	1,450 00
Fordham	2,250 00
Neponsit Beach	1,650 00
<hr/>	
Total	\$51,700 00

The establishment of stores in the hospitals of the Department for sale of fruits, candies, etc., to employees and patients was considered, but the Trustees deferred action pending a report from the General Medical Superintendent who was instructed to outline a plan for their operation.

Under the terms of a will made by Frederick T. Clarke, the Department is named as beneficiary to the extent of \$6,000. Pending a decision regarding the permanent expenditure of this money, the President was instructed to represent the Board in all matters relating thereto.

MEDICAL AND SURGICAL ADMINISTRATION

During the latter part of January there was an increase in influenza and pneumonia cases and it was necessary for a short while to restrict the visiting to patients and to segregate them into separate wards.

In granting permission to use the roof ward of Pavilions A and B for a day camp for tuberculosis patients, the details of the modifications necessary were left with a committee consisting of the President, the Director of Tuberculosis Service and the General Medical Superintendent.

Owing to the number of diphtheria cases which developed at the hospital, particularly among the children, the latter part of February, all patients on the Children's Service were given the Schick test.

On recommendation of the Medical Board the Thomas splint was introduced in the ambulance service of all the hospitals, and rules adopted that ambulance surgeons shall receive instruction in the application of these splints before they are considered competent to go on ambulance duty.

The Trustees considered it desirable to have the patients given some form of occupational work. Upon receipt of an opinion from the Corporation Counsel that there would be no legal objection, such plan being in existence in the City Hospital, occupational therapy, combined with vocational training, was introduced into the Neurological and Psychopathic Wards of Bellevue. This was afterwards extended to the Tuberculosis Wards. Later, profiting by experience of army surgeons in military hospitals during and after the great war, reconstructive apparatus was provided for the surgical wards to aid in restoration of function in patients suffering from injuries, particularly those involving the large joints.

The Department was represented by the President at a meeting held by the State Board of Charities on May 6, to consider the suggestion to make provision in the City of New York for medical treatment of sick poor in their homes.

The General Medical Superintendent has been in conference with the Instructors in Anaesthesia to formulate a plan to provide a uniform course of instruction in anaesthesia for the house staff in each of the allied hospitals.

In order to take appropriate measures to improve the medical and surgical administration of the hospitals, insofar as relates to conduct of members of the house staff, the Medical Boards were requested to designate representatives to meet new internes and impress upon them their responsibilities in the service, and the need of correct deportment in their relations with patients, their relatives and friends, as well as with the administrative offices and visiting and nursing staffs.

The ruling that members of the house staff shall be entitled to three weeks' regular leave of absence in each six months, after six months' service, was re-established.

It was found that the Children's Clinic in the Out-Patient Department is doing splendid work and that it would be desirable to have additional rooms for the babies' clinic, which could be obtained if floors now occupied by employees are made available. The General Medical Superintendent was instructed to see what could be done to find other rooms in the vicinity.

At the suggestion of the Executive Committee the custom was revived to inscribe on the memorial slab in the staff room the names of doctors who died in discharge of duty.

NURSING SERVICE

With the return of many nurses from military service the nursing situation improved. Several are still abroad and are now with the Army of Occupation in Germany.

The President has been in conference with representatives from the Pennsylvania Hospital, suggesting an affiliation between the nursing school of that hospital and the nursing school of Bellevue. This affiliation was later approved.

A request to furnish uniforms for nurses while in training was received from the Advisory Committee on Nursing. The matter was considered but the Board decided to make no change at present in the practice of requiring pupil nurses to supply their own uniforms, but agreed to make provision in the departmental estimate for materials and sewing women to carry out this work after January 1, 1921.

Early in January the Board of Managers of the Bellevue Training School for Nurses advocated a 56-hour law for pupil nurses. The Trustees were in sympathy with the situation and approved it as to principle, but regarded it as impracticable at that time, owing to the great difficulty of obtaining nurses required for proper administration of the hospital.

Because of the great difficulty in procuring regular nurses in the psychopathic wards, the employment of special nurses was authorized for this service.

During the early part of the year it was difficult to obtain special nurses for contagious diseases at the rate of \$4 a day allowed in the budget. It was therefore necessary to request the Board of Estimate and Apportionment to modify the schedule so that the Department could employ nurses at \$5 a day.

The subject of differences in salaries paid the nurses in the Department and the Department of Health was considered, and the Trustees decided to take this matter up in connection with the budget for 1920, so that a uniform rate might be established for nurses in both departments.

The desirability of establishing schools for trained women attendants at Bellevue and the Allied Hospitals was considered by the Trustees, and the General Medical Superintendent was instructed to formulate a plan for creation of such a system.

BELLEVUE HOSPITAL

GENERAL

Upon return of Dr. I. S. Hirsch, the Roentgenologist, from military service, the Department was reorganized and satisfactory adjustments in salaries made by a modification of salary schedules.

Barnum and Bailey's circus made its annual visit to the hospital on April 18 and was enjoyed by an unusually large number of patients, particularly children, many from the allied hospitals.

The boat "Southfield," formerly used as a day camp for tuberculosis patients, being of no further use, because of its condition, the Trustees requested the Commissioners of the Sinking Fund to remove same.

In October a request was received from the Auxiliary to the Tuberculosis Division for permission to purchase a barge to be used by those patients formerly cared for on the day camp. Upon recommendation of a special committee appointed to investigate this barge the Trustees authorized its purchase.

BUILDING MATTERS

There were a few changes in the plumbing in the Nurses' Residence, and the contract for installation of screens in Pavilions I and K; also shelving in the laundry were completed.

As the New York Harbor Line Board wished to modify the pierhead line in East River between 29th and 33d streets, the Department had its representatives present at the public hearing at which it was learned that the proposed modification would not affect waterfront property of Bellevue.

A committee from the Board of Trustees met with the Commissioner of Docks on the subject of use of the piers at foot of East 26th, 28th and 29th streets. As it was contemplated to use the pier at foot of East 26th Street for commercial purposes, a suggestion was made that a marginal street be constructed to carry traffic from 25th street to this pier instead of using 26th street for commercial vehicles, which, under this arrangement, would be left as a hospital street. This plan met with favorable consideration by the Commissioner of Docks.

The Trustees considered the request of the Commissioner of Correction for permission to use the pier at foot of East 29th street. After making a survey of the premises and discussing the matter, it was decided to notify the Commissioner of Correction of the policy adopted by the Trustees many years ago to improve the Bellevue waterfront by eliminating as far as possible unnecessary buildings, docks and similar structures so that the hospital grounds would be attractive and enjoyable for convalescent patients, and that the use of this pier by the Department of Correction would seriously interfere with this policy.

The Board of Estimate and Apportionment having approved plans and specifications for additional laundry machinery at an estimated cost of \$12,000, advertisement to obtain bids was authorized and contract awarded.

Authorization having been granted by the Board of Estimate and Apportionment for preparation of plans and specifications for the new buildings at Bellevue, the Trustees instructed the architects to proceed with this work as rapidly as possible so that buildings already completed may be connected by one or two additional structures.

The Trustees considered the desirability of installing a hydrotherapeutic

department at Bellevue but upon receipt of advice from the architects that the cost of such a department would be approximately \$75,000, it was decided to defer action and take up the subject in connection with construction of proposed Pavilions F and G.

GOUVERNEUR HOSPITAL

After consideration by the Building Committee, the Trustees decided to remodel the former Out-Patient Department and use it as a children's admission ward, and that the parts formerly occupied by the druggist be equipped as a staff room, and the old record room be used to extend the ward service on the maternity ward and women's medical ward.

A committee was appointed by the Medical Board to confer with the consultants of the hospital in order to arrange a weekly conference with special days and hours of consultation.

In the Out-Patient Department the Trustees authorized establishing an Eye Clinic which is to be opened as soon as an experienced oculist can be found to take charge.

The Trustees with deep regret accepted the resignation of Dr. John F. Erdmann, for many years Visiting Surgeon, and on his retirement appointed him Consulting Surgeon.

HARLEM HOSPITAL

A separate clinic for syphilis has been created, and arrangements have been made so that patients requiring treatment by salvarsan are permitted to go to their homes without spending the night in the hospital.

New apparatus for treating skin diseases is being installed, and colored charts for demonstration purposes are now being used.

A request from Fordham University to place some of their fourth year students in the gynaecological wards to act as clinical clerks was approved by the Trustees with the understanding that the students shall not make internal examinations of patients. They are to attend upon staff rooms, write up histories, make physical examinations of heart and lungs and carry out some laboratory tests, the work to be under direct supervision of the visiting staff.

The Department has under consideration the establishing of a urological service similar to that existing in Bellevue.

The present Out-Patient Department is inadequate for the large number of patients treated. A request for corporate stock for a new building is now pending before the Board of Estimate and Apportionment and until such time as funds are allowed nothing can be done to relieve the situation.

The Trustees have approved the erection of a bronze tablet with the names of doctors and nurses who served in the World War as members of Hospital Unit "F."

At request of the Manhattan State Hospital, the Trustees authorized the establishing of a class for mental diseases with return clinic. This clinic will be in operation two days each week and will be conducted by

members of the medical staff of the Manhattan State Hospital under supervision of the Neurologist of Harlem Hospital. As a result of advice given by the physicians in charge of this clinic many complete mental breakdowns will be avoided and the State Hospital authorities will be enabled to continue observation and treatment of patients during the period of their parole.

FORDHAM HOSPITAL

The Medical Board desired to change the length of service of internes to twelve months on account of difficulty in obtaining men for two years' service. As the present tendency among hospitals of the city is to adopt a standard two-year internship this was not approved, as the Trustees wish to have a uniform two years' service throughout the Department.

Bids were received on October 14 for construction work, plumbing and heating for the new buildings, plans for which have been approved by the Board of Estimate and Apportionment. Action was deferred on award of the various contracts as it was found the low bid in each instance was in excess of the appropriation. As the Trustees are desirous of opening these pavilions as soon as possible, the Building Committee was instructed to re-advertise for bids and request the Board of Aldermen for necessary additional funds with which to complete the work.

Several alterations were made in the X-ray Department, the work on which was delayed somewhat on account of inability of the contractors to obtain required stone from the quarry because of delays in transportation.

A separate clinic for syphilis has been established.

The Trustees authorized the installation of a service heater at an estimated cost of \$3,000.

The resignation of Dr. Albert F. Brugman was accepted with regret. At the same time he was made Consulting Physician.

To meet the need of additional quarters for nurses the Trustees requested the Commissioners of the Sinking Fund to execute lease of the building at 2533 Cambrelling avenue.

In accord with the practice at the allied hospitals a separate Children's Clinic was established and placed in charge of a specialist in pediatrics.

NEPONSIT BEACH HOSPITAL FOR CHILDREN

The Trustees have been informed that under the last will and testament of Annie A. Peckham a legacy of \$10,000 has been provided for the hospital. Upon suggestion of the President, the Trustees recommended that this money be used for construction of a children's playroom.

JNO. G. O'KEEFE,

Secretary, Board of Trustees.

REPORT OF GENERAL MEDICAL SUPERINTENDENT

Statistical data attached hereto show admission, discharge and movement of patients at Bellevue and each of the Allied Hospitals, with other tabulations of interest particularly to those concerned in hospital administration.

With the return from military duty of doctors, nurses and employes, the various services of the hospitals resumed their pre-war activities and approached normal efficiency.

The year was not characterized by any unusual event, such as fire, suicides or even minor accidents that seem bound to occur in institutions where large numbers of people, some of whom are helpless and irresponsible, are cared for. Great credit is due to the rank and file of the hospital personnel who, by loyal, faithful and intelligent performance of duty, made the satisfactory results of the year possible.

Because of ever increasing cost of labor and material no new construction work was undertaken. The need for continuation and ultimate completion of the buildings planned for Bellevue is each day more evident. The problem of satisfactorily administering a hospital with such widely separated units is not only difficult but uneconomical. The necessity for transporting patients, acutely ill or badly injured, two blocks through the open to get them to wards or operating rooms, ought to be overcome at the earliest moment possible. Employes are served their meals in quarters, dark, unsanitary and inadequate—a condition largely responsible for the many and frequent changes among the helper group. Adequate kitchen and dining room facilities are provided in the next section it is proposed to build—Pavilions F and G. Even though the estimated cost has increased from two to three millions of dollars the need is so urgent the additional expenditure would seem justified.

Insufficient funds have delayed awarding contract for the portable buildings proposed as a measure of temporary relief at Fordham Hospital. The inhabitants of the rapidly growing Borough of The Bronx already have been inconvenienced, if not made to suffer, by reason of limited hospital facilities within its boundaries. Fordham, the only City hospital in the Borough, when the contemplated addition is completed, will have a capacity of only 275.

Not only has no new work been undertaken at the other hospitals of the Department, but very much that is most urgent in the way of repairs and replacements has been left undone because of insufficient funds and inability to get labor. As a result buildings are rapidly deteriorating, roofs leak, walls crack and the whole place looks unkept.

The general unrest that seems to prevail throughout the world manifests itself in our midst by the demand for shorter hours and increased

wages. We are in competition with private institutions and the commercial world, and the only way I see that we can meet our problems and give the sick poor of New York the treatment to which they are entitled is to recognize this fact by giving an 8-hour day and asking the City to pay adequate salaries.

GEORGE O'HANLON,
General Medical Superintendent.

BELLEVUE AND ALLIED HOSPITALS.
